# Introduction

IES2008 is 8-port 100M unmanaged industrial Ethernet switch. It provides 100M copper ports and adopts DIN-Rail mounting or wall mounting, which can meet the requirements of different application scenes.

The DIP switch can achieve loop detection, storm suppression, one-key VLAN and flow control. Hardware adopts fanless, low power consumption, and has passed rigorous industrial standard tests, which can suit for the industrial scene environment with harsh requirements for EMC. It can be widely used in railway transportation, smart city, safe city, new energy, intelligent manufacturing, and other industrial fields.
